Maybe even better than free.

If only we could, we surely would! On the other hand, using file can actually save you money. Keep your files private, or send your download links only to friends or family. Why pay storage fees for a file that you just wanted to send to a friend or colleague? Also, many team chat apps have limits to the size of files that can be transferred within their apps. There are no restrictions on the number of times a file can be downloaded. It is also allowed to link to the download page from websites and communities. filehosting provides an easy possibility for you to send large files to your friends. No account or credit card is required to get started. You decide who you want to share your files with. Alternatively you can choose to share your download links on blogs, forums and social networking sites. Files transferred the old-fashioned way tend to pile up and be forgotten about, eventually costing you money in data storage fees. The cost of that data transfer is covered by your internet service or the data plan on your phone. Any file in any format can be uploaded and downloaded for free. When you use file, you avoid storing the file you're sending in your cloud storage or mail server. Files can be downloaded from any computer from our high speed servers. File is free to use with no gotchas and no hidden fees. Unfortunately, we can't make that part free. You can upload any type of file (movies, music, documents, images, zip files and more).
