Your wallet will be none-the-lighter! Just so we're all 100% clear here: When you share a file, data is being transferred between your computer or phone andour servers, then from our servers to your friends device. Files can be downloaded from any computer from our high speed servers. It is also allowed to link tothe download page from websites and communities. You can give this download link to your friends by mail or instant messenger. This is easy, fast and reliable filehosting! You don't need any kind of premium-accounts. Our service is completely free for everyone. No account or credit card is required to get started. The cost of that data transfer is covered by your internet service or the data plan on your phone. You don't need any special software installed to be able to download your files. File is free to use with no gotchas and no hidden fees. Files transferred the old-fashioned way tend to pile up and be forgotten about, eventually costing you money in data storage fees. Simply upload your file and share the link. Keep your files private, or send your download links only to friends or family. Just upload the file you want to share with your friends and we send you a download link to your file. So try our free and simple filehosting servicenow. You decide who you want to share your files with. Unfortunately, we can't make that part free. When you use file, you avoid storing the file you'resending in your cloud storage or mail server. Why pay storage fees for a file that you just wanted to send to a friend or colleague? Also, many team chat appshave limits to the size of files that can be transferred within their apps. If only we could, we surely would! On the other hand, using file can actually save youmoney. filehosting provides an easy possibility for you to send large files to your friends. There are no restrictions on the number of times a file can bedownloaded. Alternatively you can choose to share your download links on blogs, forums and social networking sites. You can upload any type of file
