

OPERATION

TIPS ON SAVING ENERGY AND WATER

- To save energy and water:
- Do not use PREWASH for lightly to normally soiled items.
- For lightly soiled items use "QUICK WASH".
- Soak heavily soiled items.
- Wash using maximum recommended loads.

Once the water valve(s) have been opened, washer has been loaded and dispenser drawer filled the washer is ready to be started.

IMMEDIATE START:

- Close the door of the washer making sure that the door latches closed.

- Press the "ON/OFF" button (Figure 7, below). The "ON/OFF" indicator light will become illuminated and the "START" indicator light will begin to flash.

Figure 7.

- Use the Cycle Selector, see Figure 8, to select the cycle desired. The cycle length, in minutes, will be displayed in the "Cycle Countdown" alphanumeric display.

Figure 8.

CYCLE SELECTION

It is easy to make cycle selections with the Bosch washer. Simply turn the cycle selector knob to one of the selections listed on the dial. The washer offers 12 standard wash cycles, combinations of 4 fabric types and 6 wash temperature settings as well as 9 Special Cycles. The selections are descriptive of the type of wash that is to be cleaned or provide special control features to allow manual operation of the washer in the modes desired; such as, spinning, soaking or draining.

Directly to the left of the Cycle Selector window you will find a table, see Figure 9, that as a reminder, provides a brief description of the meaning of the numbers listed on the cycle selector knob.

Special Cycles	Wash Temperatures
11 Rinse/Spin	5 Power Temp Boost
10 Soft Rinse/Spin	4 Temperature Boost
9 Spin	3 Hot
8 Soft Spin	2 Warm
7 Soak	1 Cold
6 Drain	

Figure 9.

STANDARD WASH CYCLES

4 Fabric Types:

1. Regular/Cotton

The cotton settings are intended to be used for sturdy, hard wearing items made from cotton or linen, such as:

- Play clothes
- Work clothes
- Sheets
- Towels
- Jeans
- Fabrics, etc.

For best results when cleaning heavily soiled items use the PREWASH additional function. Refer to the care label on the clothing for settings to use. In general, the POWER TEMP BOOST (5) setting is recommended for sturdy whites and linens. The (3), (2) and (1) settings save energy when cleaning lightly soiled cottons. The cold (1) setting is recommended for very bright colors that are lightly soiled. Using the hottest temperature safe for the fabric will usually provide best cleaning results.
