Choosing the installation site
 Air supply outlet obstruction kit. Group Controller. Group Controller kit. Zone Manager kit. Zone Manager. Infrared control kit 2. Not to be used on units equipped with electric heater mod. 40GKX1.W. IMQ approved kit. Nonlevel installation which will cause condensate dripping. MAX 200 mm These may only be used near the unit with a maximum height Excessive connection pipe length see installation manual of Installation. Max. 2 louvres closed Alternatively the louvres can be placed in intermediate positions It is advisable to place the unit as close as possible to the First position the refrigerant lines, as described in the chapter Remove the "T" bar in order to facilitate installation operations. Unit installation will be facilitated using a stacker. If plaster board ceiling panels are installed the maximum In rooms with high humidity, brackets should be insulated using the Installation Carefully lift the unit without the frame using the four If the "T" bar cannot be removed the unit may need to be tilted Mark the position of the hangers, refrigerant lines and condensate Depending on the type of ceiling the hangers can be fixed as Nut. Wooden frame. Threaded hangers. Washers. Nut Washer. Washer. Nut. Once the threaded hangers have been positioned, do not tighten Align and level the unit by adjusting the nuts and locknuts on Reposition the "T" bar and align the unit in relation to the bar by After connection of the condensate drain line and the refrigerant Making the hole for connection pipes in the external wall. The same hole can be used as a Carefully unpack the assembly and check for damage sustained in Insert the plastic conduit provided. Condensate drain pipe Tighten the four screws, link the electrical connectors and insert the Use the screws supplied to fix the frame in position. http://www.w-f-l.de/user_img/eberspacher-repair-manual.xml

Furthermore an odour trap of at least 50 mm depth should be a float valve is recommended to stop the compressor if there is a return air from mixing with outdoor air. In the drawing gasket "A" prevents return air from mixing with outdoor air. On completion, the gap between the unit frame and the false ceiling is sealed. If unit is uninstalled first refer to the outdoor unit installation manual for tube sizing, pipe connection to the unit. Use two wrenches to tighten all connections. Insufficient tightening torque could cause a refrigerant leak from the pipe flare. Excessive tightening torque will damage the pipe flare. Tube diameter. Mod. Under no circumstances use sanitary type copper pipe. Flaring the end of pipes. Tube diameter. Nm. Remove the protection caps from the copper pipe ends. Holding the tube downward, cut the extreme end off, removing any burrs. Remove the flare nuts from the "FLARE" connection body of the unit. Make the flare to the pipe end with the proper flaring tool. Once all connections have been completed, check for leaks using a leak detector. Finally, wrap connections with anticondensate insulation and extra charge of refrigerant. With pipe lengths up to 8 metres, the models shown below need an extra charge of refrigerant. For longer pipes, refer to the outdoor unit installation manual. Indoor unit model. Outdoor unit model. Pipe lengths. Flare end must not have any burrs or imperfections. The length of the flared walls must be uniform. Lubricate the end of pipe and the thread of the flare connection. Tighten by hand and then use two wrenches to tighten all connections. Checking. Pour several litres of water into the condensate drain pan and check pipe gradient and look for possible obstructions. Condenser. Ground connection screws. Internec board. Auxiliary board. Outdoor unit connection. Control panel can be reached by opening the grille and removing its float connector. Pump connector. Louvre connector. A. Electric heater supply. B. Outdoor unit connection. C. Polarised connectors.

If errors are made during the operation previously described, switch off the power. Connect the power cables to terminal box connectors in accordance with the terminal box legend. IMPORTANT for units equipped with electric heater. The unit is equipped with two thermostats one with automatic reset. Ensure that the mains supply connection is made through a switch. IMPORTANT for heat pump units. The indoor unit control panel is supplied with a resistor. If the outdoor unit terminal block is supplied without terminals, the outdoor unit terminal block is provided with terminals "S1". Heat pump terminal box legend, all models. Earth. Y Compressor interlocking contact. O

Reversing valve control HP only. W2 Outdoor fan signal HP only. S1 Outdoor coil sensor HP only. S2 Outdoor coil sensor HP only Outdoor unit. Main switch. Timedelay fuse or circuit breaker see outdoor unit installation manual. Resistor 47 KOhm. Note Exsport Market Model Clip Insulated flexible duct. Fresh air intake. Conditioned air supply to an Air intake grille Conduits can be of flexible polyester with spiral core or Air distribution to adjacent room With a pencil, trace a line on the polystyrene around the inside Cut away the polystyrene with a knife, taking care not to damage Not observing of these instructions may cause condensate Fresh air intake Remove the polystyrene partition. Introduce baffle supplied after frame has been hooked as per above External static pressure Pa In case of two louveres closed, the fresh air flow towards the adjacent room is 50% higher compared with only one louver Fresh air renewal.

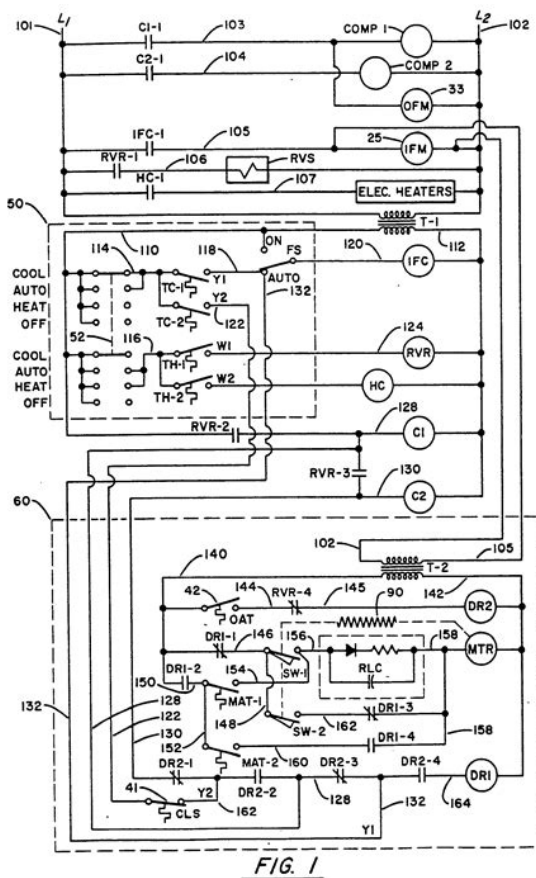

FIG. 1

<http://superbia.lgbt/flotaganis/1649439955>

Conditioned air supply to an adjacent room To adjust the fan motor air flow to the required values it is Fresh air flow must be less than 10% of the total air flow, to For fresh air ventilation rates higher than 10%, a primary air The kit cannot be used in units equipped with electric An air inlet grille must be fitted if possible near the floor Filter installation also makes the installation of a duct closing Remote control configuration. Once the electrical connections have been completed, enter Check the correct positioning of the switch see "Electrical Incorrect switch positioning will cause serious damage to the Remote control configuration with cable connection has to be To configure the control proceed as follows For information on the remote control refer to the operation Operating test. See owners manual, unit LEDs and controls paragraph. The installer must check that conditions 1, 2 have been fulfilled. Additional maintenance. Cleaning and maintenance operations must be carried out by The inspection or replacement of internal components such as Before performing any service or maintenance operations, To open the unit grille. Condensate drain pan removal Filter cleaning. Clean filters in accordance with the actual operating Electrostatic

and active carbon filters which can be used on Extract the filter. Guide for the owner. Acrylic air filter. First vacuum clean the filter, then wash under tap water and Replace the filter in the correct position. When installation and tests are completed explain the Operation Prolonged shutdown Leave the two installation manuals for the indoor and outdoor. Page 4 Correct gebruik NEDERLANDS 5 MIN. Als de airconditioner met de regelschakelaar of door enige andere oorzaak is gestopt, moet minimaal 5 minuten worden gewacht alvorens weer kan worden ingeschakeld. Anders kan de zekering doorslaan of de compressor worden beschadigd. Zorg ervoor dat de unit vrij kan uitblazen.

<http://jointworkstudio.com/images/calcomp-1043-manual.pdf>

Plaats geen grote voorwerpen voor de unit en vermijd zo mogelijk directe zoninstraling in de te conditioneren ruimte. Er moet minimaal 200 mm. Page 5 Koelen met ontvochtigen 1 2 Luchtstroom 3 Voorkom onnodige bochten in de afvoerslang. Luchtstroom De flexibele slang in de transportinrichting inbrengen. Teneinde de beste prestaties te bekomen dient men bij het plaatsen van de slang erop te letten dat de binnenste randen van het flexibele gedeelte omgedraaid zijn zoals weergegeven in de figuur; het uitrekken beperkt wordt tot het benodigde minimum; bochten, plooiën en beperkingen worden vermeden. Page 6 Onderhoud NEDERLANDS Vervuilde filters belemmeren de luchtdoorstroming, waardoor het economisch gebruik van de airconditioner nadelig wordt beïnvloed. Controleer de filters dus regelmatig. Ze bevinden zich aan de zijkanten van de unit, achter de aanzuigroosters, en u kunt ze verwijderen door het op nokje aan de buitenrand te drukken. Verwijder los stof door het filter met de hand uit te kloppen of met een stofzuiger schoon te maken. February, 2005. Printed in Italy. Summer is just around the corner and thought of scorching sun flame is already evaporating your comfort. This summer it is going to be something different. Just bring home Carrier 40GKX 024RB 2 Ton Cassette AC. It is the perfect blend of style and functionality to offer best of class cooling solution for home as well as office. Capacity The AC houses a powerful 2.0 Ton Rotary Compressor that is aptly capable of dropping down the temperature of any large space. The outer casing is made of Galvanized steel with powder coating to withstand any climatic hardship. The indoor unit measures 298 x 575 x 575 mm H x W x D and weighs only 18 Kg. The outdoor portion is of 44 Kg weight. Air Filters The AC has a powerful Air Flow Rate 570 CFM. Hydrophilic Blue Aluminium Fins eliminates the chance of accumulation of condensate water into the evaporator coil which in turn improves Indoor Air Quality. Now breathe fresh and stay healthy. Controls The whole unit is coupled with a fully functional wireless LCD Remote Control. The feather touch buttons are easy to press and offer galore of userfriendly setting modes for hasslefree operation. Speed of Cooling Enhanced Coil Heat exchange is the outcome of sine wave fin and inner grooved copper tubes. It results in efficient and even cooling. The model is equipped with R22 refrigerant for longer preservation of desirable temperature. Sleep Mode and Timer Auto Sleep Mode saves energy at night by automatically adjusting temperature when activity is lowest. Noise Level The audible noise level of this cassette AC varies on a scale of 41.9 to 49.5 dB which is almost hard to divert your senses.

Any Other Features Some additional features that will make the cooling experience more pleasant are Pre Filter, Auto Self Diagnosis, Cool Mode, Sleep Mode, Fan Mode, Dry Mode, Real Time Clock etc. Get Latest Price from the seller We are the authorized dealers for Hitachi Air Conditioners and many more.
